

# 2015 JSNA

Outcomes Frameworks
April 2016

2	Summary
3	CCG Outcomes Framework
7	NHS Outcomes Framework – Local Authority
10	Public Health Outcomes Framework
15	Adult Social Care Outcomes Framework

#### **Summary**

The following briefing summarises the key national outcome framework performance profiles for Stockport, highlighting areas of good practice as well as areas of concern.

A consistent theme across all frameworks are that outcomes where Stockport performs poorly relate to **alcohol** and liver disease and indicators which are based on **emergency or unplanned admissions to hospital**.

A national outcome framework for the health and wellbeing of children has yet to be developed, but there are indicators within the Public Health Outcome Framework which are specifically targeted at these groups.

#### **CCG Outcomes Framework for Stockport – December 2015**

joint strategic needs assessment

The following pages show a spine chart summary of the key indicators from the CCG Outcome Framework for Stockport, taken from the national tool in December 2015; for data updates visit <a href="http://ccgtools.england.nhs.uk/ccgoutcomes/flash/atlas.html">http://ccgtools.england.nhs.uk/ccgoutcomes/flash/atlas.html</a>. Data is presented by CCG registered population.

The demographic context set out in the analysis confirms the trends identified in other parts of this JSNA, that Stockport's population is older than average, and has particularly low levels of population in the 20-29 age group. For most long term conditions and diseases Stockport has average prevalence rates; however rates are higher for asthma, heart failure due to left ventricular dysfunction (LVD) and dementia and lower for chronic kidney disease and rheumatoid arthritis. For a full analysis of disease prevalence see the separate JSNA analysis.

The table below summarises the indicators where Stockport performs in either the best or worst quartile nationally – for all other indicators current performance levels are similar to the national average. Key messages arising from this analysis are that outcomes relating to liver disease and hospital admissions are the ones on which Stockport performs poorly. These are areas where performance has been consistently lower than average.

In best quartile nationally	In worst quartile nationally
Domain 1 – Preventing people from dying prematurely	
One year survival from all cancers combined	Myocardial infarction, stroke and stage 5 kidney disease in people with diabetes
One year survival from breast, lung and colorectal cancers	Emergency admissions for alcohol related liver disease
Record of stage of cancer at diagnosis	<ul> <li>All cause mortality – 12 months following a first emergency admission to hospital for heart failure aged 16+</li> </ul>
Domain 2 – Enhancing the quality of life for people with long-term conditions	
Proportion of people feeling supported to manage their condition	Unplanned hospitalisation for chronic ambulatory care sensitive conditions
<ul> <li>Access to community mental health services by people from BME groups</li> </ul>	<ul> <li>Unplanned hospitalisation for asthma, diabetes and epilepsy (under 19s)</li> </ul>
Health related quality of life for carers aged 18+	Complications associated with diabetes
	<ul> <li>Access to psychological therapies by people from BME groups</li> </ul>
Domain 3 – Helping people to recover from episodes of ill health or following injury	
Elective knee preplacement procedures – patient reported outcome measures	Emergency admissions for acute conditions that should not usually require admission
Hip fracture timely surgery	<ul> <li>People who have had an acute stroke who receive thrombolysis</li> </ul>
	People with stroke who are discharged with a joint health and social care plan
	Alcohol specific hospital admissions
	Emergency alcohol specific readmissions to any hospital within 30 days of discharge from
	hospital following an alcohol specific admission
	<ul> <li>Unplanned readmissions to mental health services within 30 days of a mental health</li> </ul>
	inpatient discharge, aged 17+
	Percentage of adults in contact with secondary mental health services in employment
Domain 4 – Ensuring that people have a positive experience of care	
Patient experience of GP out-of-hours services	Responsiveness to inpatients' personal needs
Domain 5 – Treating and caring for people in a safe environment and protecting them	rom harm
No indicators are in best quartile in Stockport	No indicators are in worst quartile in Stockport

#### Public Health Outcomes Framework for Stockport – November 2015

Health related quality of life for older people

STOCKPORT healthwatch

## Stockport JSNA

joint strategic needs assessment

The following pages show a spine chart summary of the key indicators from the Public Health Outcomes Framework for Stockport, taken from the national tool in November 2015; for data updates visit <a href="http://www.phoutcomes.info/">http://www.phoutcomes.info/</a>. Data is presented by LA resident population.

The table below summarises the indicators where Stockport performs in either the best or worst quartile nationally – for all other indicators current performance levels are similar to the national average. Key messages arising from this analysis are that **Stockport performs better than average on a range of measures, especially in health protection, however outcomes relating to hospital admissions, liver disease and certain cancer screening are the ones on which Stockport performs poorly.** These are areas where performance has been consistently lower than average.

In best quartile nationally	In worst quartile nationally
Overarching Indicators	
Healthy life expectancy at birth - male	No indicators are in worst quartile in Stockport
Healthy life expectancy at birth - female	
Life expectancy at 65 – male	
Domain 1 – Wider Determinants of Health	
Children in poverty	School readiness - children with free school meals status
School readiness – all children	Violent crime – hospital admissions for violence
First time entrants into youth justice system	
Killed and seriously injured casualties on roads	
Rates of complaints about noise	
Statutory homeless in temporary accommodation	
Fuel Poverty	
Social isolation of carers	
Domain 2 – Health Improvement	
Breastfeeding at 6-8 weeks	<ul> <li>Hospital admissions caused by injuries in children and young people (aged 0-24)</li> </ul>
Child obesity for 10-11 year olds	Admission episodes for alcohol related conditions
Cancer screening coverage - cervical cancer	Cancer screening coverage – breast cancer
• Screening coverage – new-born blood spot, diabetic retinopathy, AAA, NHS Health Check	Cancer screening coverage – bowel cancer
	Injuries due to falls in people aged 65+ (hospital admissions)
Domain 3 – Health protection	
Chlamydia protection rate	No indicators are in worst quartile in Stockport
Vaccination coverage	
Incidence of TB	
Domain 3 – Healthcare and premature mortality	
Tooth decay in children aged 5	Mortality rate from causes considered preventable
Under 75 mortality rate from all cardiovascular causes and those CVD considered	Under 75 mortality rate from all liver disease and liver disease considered preventable
preventable	Suicide rate (one year anomaly)
Under 75 mortality rate from all respiratory disease	Emergency admissions within 30 days of discharge from hospital
Mortality from communicable disease

#### Adult Social Care Outcomes Framework for Stockport – June 2015

The following pages show a spine chart summary of the key indicators from the Adult Social Care for Stockport, taken from the national tool in June 2015; for data updates visit http://fingertips.phe.org.uk/profile/adultsocialcare/. Data is presented by LA resident population.

The table below summarises the indicators where Stockport performs in either the best or worst quartile nationally (where value judgements are made) – for all other indicators current performance levels are similar to the national average. Key messages arising from this analysis are that Stockport performs better than average on a range of measures, especially in quality of life, however outcomes relating hospital admissions and permanent care home admissions the ones on which Stockport performs poorly. These are areas where performance has been consistently lower than average.

	These are areas where performance has been consistently lower than average.		
	est quartile nationally	In w	orst quartile nationally
Don	nain 1 – People with care and support needs		
•	Index of Deprivation – Older Persons Index	•	Prevalence of dementia
•	% in long term unemployment		
•	Prevalence of mental health diagnoses		
Don	nain 2 – Enhancing quality of life for people		
•	Proportion of people who receive self-directed support	•	Adults in contact with mental health services in employment
•	Proportion of people who receive direct payments	•	% of clients aged 18-64 receiving self directed support
•	Adults with learning disabilities in employment and in settled accommodation		
•	Adults in contact with mental health services in settled accommodation		
•	Proportion of people who use services and their carers who reported that they had as		
	much social contact as they would like		
•	% of clients aged 65+ receiving self directed support		
Don	nain 3 – Delaying and reducing the need for care and support		
•	% of older people who were still at home 91 days after discharge from hospital	•	Permanent admissions to residential and nursing care homes
•	% of older people offered reablement services following discharge	•	Emergency readmissions within 28 days
•	Total delayed transfers of care		
Don	nain 4 - Ensuring a positive experience of care and support		
•	Overall satisfaction of people who use services with their care and support	•	Proportion of people who use services and carers who find it easy to find information
•	Overall satisfaction of carers with social servicers		about services
Don	nain 5 – Safeguarding vulnerable adults		
•	People aged 65+ receiving winter fuel payments	•	Proportion of people who use services who feel safe
		•	Proportion of people who use services who say that those services have made them feel
			safe and secure
		•	Injuries due to falls in people aged 65+ (hospital admission)
		•	Fuel poverty
Bett	er Care Fund		
•	Delayed transfers of care per month per 100,000	•	Permanent admissions to residential and nursing care homes
•	Total delayed transfers of care	•	Injuries due to falls in people aged 65+ (hospital admission)
•	% of older people who were still at home 91 days after discharge from hospital	•	Reducing avoidable emergency admissions
•	% of older people offered reablement services following discharge		
•	Social isolation of carers
